

**You're Invited to the 2nd Public Meeting
For The Buckman Direct Diversion Project
Independent Peer Review!**

ChemRisk, a national leader in investigating historical operations at U.S. weapons plants, has completed its draft report of the Independent Peer Review (IPR) of potential health risks to the public from future use of the Rio Grande as a source of tapwater.

At this second of three public meetings, the IPR team will give a presentation to:

- Introduce the IPR team of toxicologists, scientists, hydrologists, risk assessment specialists, and medical doctor from ChemRisk and partner AMEC Earth and Environmental, who are conducting the IPR;
- Provide an overview of the independent peer review process and the preliminary results; and
- Provide information on how to obtain copies of the draft IPR deliverables and how to provide comments.

**September 30th
6:00-8:00 p.m.
Community Room
Genoveva Chavez Community Center
3221 Rodeo Road
955-4000**

Following the presentation, a Q & A session will be held where attendees will have the opportunity to ask questions about the peer review process and the preliminary results. Comments and questions offered at this meeting will be summarized and considered as part of the formal public review.

Refreshments will be served. For more information, visit: www.bddproject.org, www.chemrisk.com or contact **Erin Shay** at eshay@chemrisk.com or 412-281-6900 ext. 1022.

Hosted by BDD Project Board
